EDUCATION

Northwestern Michigan College   August 2017 – May 2019

Computer Information Systems

- Cumulative GPA 3.93/4.0
- Furthered my HTML5, CSS3, JavaScript, and PHP skills.
- Learned about databases and SQL commands.
- Built .NET Console, WPF, and ASP.NET MVC applications with C#.
- Designed and developed an Angular messaging application with a team. Utilized Okta for authentication, Pusher Chatkit's messaging service, and NodeJS with Express on the backend. Practiced Agile methodologies.

Ferris State University   August 2019 – Present

Computer Information Systems (BS) & Information Security and Intelligence (Minor)

- Cumulative GPA 3.94/4.0
- Furthered my Systems Analysis and Design skills.
- Learned about Computer Networking and Information Security principles.
- Gained experience in Web Application Ethical Hacking.
- Built native Android mobile apps with Java and Android Studio.

WORK EXPERIENCE

Hagerty, Traverse City – Software Engineer Intern   May 2019 – Present

- Implemented multiple features in an ASP.NET MVC data validation tool.
- Used HTML, CSS, Bootstrap, and Material Design Lite to build front-end views.
- Utilized JavaScript, jQuery, RivetsJS, and Razor to manipulate and bind data to ASP.NET Views.
- Developed backend C# controllers, models, interfaces, and classes to handle HTTP requests.
- Built SOQL queries to retrieve data from Salesforce and used LINQ to query SQL databases.
- Refactored the Agile Accounting project, written Python and Django, to track monthly work in IT.

Hagerty, Traverse City – IT Applications Intern   May 2018 – May 2019

- Responsible for designing, building, and managing an automation testing application to ensure that Hagerty's Salesforce org components and website were fully functional in multiple environments.
- Wrote automated tests using Typescript and Nightwatch.js, following the Page Object Model.
- Developed SOQL and SQL queries to retrieve records from Salesforce and the source system.
